

Scenarios - Music Streaming Application

1. Sign-Up Process for new user:

- **Scenario:** Anushka is a first-time user of the app and wants to create an account to start stream music.
- **Actions:**
 - Anushka clicks on sign-up button on the landing page.
 - She is prompted to choose between signing up using email, phone no, or social media accounts(Google, Facebook, Apple).
- **Expected Outcomes:** Anushka successfully creates her account, and is directed to a personalised music dashboard.

2. Login Process for Returning users:

- **Scenario:** Saeed has previously created an account and wants to log back into the app on a new device.
- **Actions:**
 - Saeed clicks the login button and then directed to login page.
 - There she enters the email-id and password which she previously logged in with.
- **Expected Outcomes:** Saeed is able to log-in securely and can listen to music.

3. Accessing Premium Subscription:

- **Scenario:** Aarya has been using the free version of the app for a while, but now she wants to upgrade to premium plan to enjoy ad-free music experience.
- **Actions:**
 - Aarya clicks on the "Explore Premium" button in the app's menu.
 - She is shown a comparison between the free and premium version, benefits of the upgrade are shown.
 - She then clicks the premium plan (monthly, yearly).
 - She then enters the card details and make payment. After successful payment, she is directed back to the homepage and now can use premium.
- **Expected Outcomes:** Aarya successfully upgrades to premium, and can enjoy an ad-free experience.

4. Navigating the Homepage:

- **Scenario:** Soham has just logged in the app and is exploring the homepage to find new music, playlist and recommendations.
- **Actions:**
 - Soham lands on the homepage, where he sees the personalised recommendations at the top.
 - He scrolls through different sections like "Recently Added", "Top Charts", "New Releases".
 - He clicks the recommendation album and starts streaming it immediately.
 - He can explore through various genres and trending playlist based on his past listening habits.
- **Expected Outcomes:** Soham can easily navigate the homepage, discover new music, and listen to it without any hassle.
